

Detailed Operation Schedule

From:	To:	LUJAN	WNR	Line X/B/C	IPF	<i>-Notes-</i>
9/29 8:00	10/7 8:00	OFF	Production MPEG to WNR T4	Standby	Standby	LBEG: Start up tuning to PSR only MPEG: 4.0 μ A, 100 Hz, 1.8 μ s H-GX: available on request IPF: available on request
10/7 8:00	10/11 8:00	OFF	Production MPEG to WNR T4	Standby	Standby	LBEG: Start up tuning to PSR only MPEG: 4.0 μ A, 100 Hz, 2.34 μ s (CD=13) H-GX: available on request IPF: available on request
10/11 8:00	10/14 16:00	OFF	Production MPEG to WNR T4	Standby	Standby	LBEG: Start up tuning to PSR only MPEG: 4.0 μ A, 100 Hz, 1.8 μ s H-GX: available on request IPF: available on request
10/14 16:00	10/16 8:00	Tuning and commissioning	Production MPEG to WNR T4	Standby	Standby	LBEG: Start up tuning to PSR only MPEG: 4.0 μ A, 100 Hz, 1.8 μ s H-GX: available on request IPF: available on request
10/16 8:00	10/17 8:00	Tuning and commissioning	Production MPEG to WNR T4	Standby	Standby	LBEG: 20 Hz, Various currents for commissioning MPEG: 4.0 μ A, 100 Hz, 2.34 μ s (CD=13) H-GX: available on request IPF: available on request
10/17 8:00	10/22 16:00	Tuning and commissioning	Production MPEG to WNR T2	Standby	Standby	LBEG: 20 Hz, Various currents for commissioning MPEG: LINAC to T2 H-GX: available on request IPF: available on request
10/22 16:00	10/24 8:00	Intermittant or OFF	Intermittant or OFF	Intermittant or OFF	Intermittant or OFF	Machine Intervention and Machine Studies. Intermittant beam may be available to all areas depending on intervention/studies activities.
10/24 8:00	10/26 16:00	OFF	OFF	OFF	OFF	Facility maintenance and source recycle.
10/26 16:00	10/28 8:00	Tuning	Tuning	Tuning	Tuning	Tune for production to all areas.
10/28 8:00	11/14 8:00	Production Lujan	Production MPEG to WNR T4	Standby	Standby	LBEG: 100-125 μ A, 20 Hz MPEG: 4.0 μ A, 100 Hz, 1.8 μ s H-GX: available on request IPF: available on request
11/14 8:00	11/15 8:00	Intermittant or OFF	Intermittant or OFF	Intermittant or OFF	Intermittant or OFF	Machine Intervention and Machine Studies. Intermittant beam may be available to all areas depending on intervention/studies activities.
11/15 8:00	11/27 8:00	Production Lujan	Production MPEG to WNR T4	Standby	Standby	LBEG: 100-125 μ A, 20 Hz MPEG: 4.0 μ A, 100 Hz, 1.8 μ s H-GX: available on request IPF: available on request
11/27 8:00	11/28 8:00	Intermittant or OFF	Intermittant or OFF	Intermittant or OFF	Intermittant or OFF	Machine Intervention and Machine Studies. Intermittant beam may be available to all areas depending on intervention/studies activities.
11/28 8:00	11/30 16:00	OFF	OFF	OFF	OFF	Facility maintenance and source recycle.
11/30 16:00	12/2 8:00	Tuning	Tuning	Tuning	Tuning	Tune for production to all areas.
12/2 8:00	12/21 8:00	Production Lujan	Production MPEG to WNR T4	Standby	Standby	LBEG: 100-125 μ A, 20 Hz MPEG: 4.0 μ A, 100 Hz, 1.8 μ s H-GX: available on request IPF: available on request
12/21 8:00	12/23 8:00	OFF	OFF	OFF	OFF	Accelerator Documentation and Facility Shutdown. A detailed plan will be provided.
12/23 8:00		OFF	OFF	OFF	OFF	All beams off. Extended Maintenance Period commences.
